

How to Text a Librarian

Now that you have our text messaging info, save it into your phone “contacts” to text us later.

Every phone is different but it should look something like this.

1. Create a new contact:

Save **pjfl** as the first name and **askpjfl** as the last name.

2. Enter Phone Number

Enter **66746** in as the Phone Number.

What it will look like in your contacts when you're finished.

3. When you want to text us:

Compose a new text message to **66746**. Begin the first line with **askpjfl** followed by a space.

When you reply you don't need to type askpjfl.

4. Wait for your response.

If you share our text messaging info with your friends/colleagues, make sure you let them know to use **askpjfl** the first time they send us a text.

That's it, you're ready to go!
